Travelin' on prayers & delays

Thank you for your patience in holding for the rest of the story with Chuck flying to Tampa.

After 18 holes of golf, Chuck arrived at the Indy Airport at 3:30. He was told his flight was delayed by an hour. No problem. He had his James Pat-

COLUMNIST

terson book with him as well as a few crossword puzzles to keep him busy.

Meanwhile, in Tampa, I knew I was headed toward an arriving storm when I left the house at 6:00. I hoped it would not affect Chuck the way it affected me the night

As I took the exit from Interstate 75 to 4 it began to rain. Forget raining cats and dogs. I'm talking alligators and miniature whales.

Then this little light decided to appear on my dashboard. It's the one that tells you your tires have a problem ... the "low tire" light. Seriously? I might have uttered the four-letter "S" word. You know, the one that

I prayed, hoping God had not heard what I might have uttered.

I kept driving. I knew I had not run over anything. I neither felt nor heard anything like a flat tire.

I got to the cell lot. I held my breath as I hoped my tire would hold its air.

The large board at the cell lot kept telling me that Chuck's flight would be delayed ... and delayed more ... and more.

The thunder rolled and the lightning flashed. The sign went black.

My phone dinged a text message from Chuck. "I'm on the ground ... in Orlando. Not sure how long it will be. We kept circling around Tampa until the pilot came over the intercom and said we were running out of fuel."

About 10:00 the board was back up and said the arrival of Chuck's plane would be 10:30, three hours after his original ETA.

He made it ... safe and very tired.

He hopped in the driver's seat and said, "Did you know the tire light is on?" I gave him "the wife" look.

He did have another story to tell. Seems while on the ground in Orlando the people standing in the aisles were told to hurry to their seats that if they did not take off within 10 minutes the crew would "time out" and they would have to wait for another fresh crew to arrive. He never saw people move so fast to get to their seats.

"It is an exciting time for Climb Out of the Darkness and a growing awareness worldwide of the mental health needs of new and expecting parents," said Wendy N. Davis, Executive Director of Postpartum Support International. "Working together, we are improving the safety net for families around the world. This event unifies those suffering, survivors, doctors, therapists, in the fight against perinatal mental health complications. We hope you will join us."

Money raised by the Climb will support PSI's goal to provide funds to local groups and organizations, provide low-cost training in perinatal mood

underserved areas, train law enforcement, and legal experts, mentor peer supporters and group leaders, and train primary healthcare providers.

reporting. Bingman, who serves said the honor should give residents of Carmel a level of comfort and assurance that the City has a strong financial reporting system in place, one that passes the scrutiny of both an external audit and the prestigious Certificate of Achievement he said.

"As a landscape photographer, I am inspired by the immense variety and beauty of landscapes across the U.S.," he said.

On the walls of Four Day Ray, you'll see photography capturing color-rich landscapes and cityscapes that pull you in to savor the details. Drop in any day of the week to grab a local brew, a delicious meal, and enjoy Jack's work now through Sept. 29.

You're invited to meet Jack in person at his public reception from 4:30 to 7:30 p.m. on Monday, July 11 in the Brewery at Four Day Ray, 11671 Lantern Road, Fishers.

John Dierdorf

Head over to Noblesville of the program, which in- as Carmel City Controller, to check out Dierdorf's latest exhibit.

Dierdorf first picked up a paintbrush in college while studying fine arts and discovered the limitations of realism. He felt restrained.

"If I wanted to take a picture, I'd take a picture,"

Inspired by Monet, Pissarro, and other Impressionists, he began developing his own expressions.

The foundational skills Dierdorf developed propelled him into architecture. Between his career and family, he wouldn't actively pursue painting again till later in life. And when he did, he became both an artist and arts advocate.

His style has recently taken a more nuanced tone, shifting further from realism. The goal is to provide "a two-fold impression" of his subject matter. Thin lavers and bright colors give the viewer one impression while standing back, and then another once the view-

Crypto: investment or speculation?

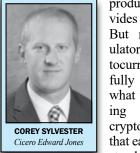

tocurrencies much in the news, you might be wondering if you should invest in them. But "invest" may not be the right word because, in many ways,

crypto-

short, are more speculation than investment.

But what's really the difference between a speculator and an investor? Probably the main factor is the differing views of time. A true investor is in it for the long term, building a portfolio that, over many years, can eventually provide the financial resources to achieve important goals, such as a comfortable retirement. But speculators want to see results, in the form of big gains, right now – and they're often willing to take big risks to achieve these outcomes.

There's also the difference in knowledge. Investors know that they're

services. But many specwhat they're buying – because crypto just isn't that easy to under-

stand. Cryptocurcurrencies, or "crypto" for rency is a digital asset, and cryptocurrency transactions only exist as digital entries on a blockchain, with the "block" essentially being just a collection of information, or digital ledgers. But even knowing this doesn't necessarily provide a clear picture to many of those entering the crypto world.

understanding, two other elements help define cryptocurrency's speculative nature: volatility and lack of regulation.

Volatility

Cryptocurrencies subject to truly astonishing price swings, with big

products or pro- Actually, several factors are in regulating various ininvolved.

For one thing, the price ulators in cryp- of Bitcoin and other cryptotocurrency don't currencies depends heavily fully comprehend on supply and demand – and the demand can skyrocket when media outlets and crypto "celebrities" tout a particular offering. Furthermore, speculators will bet on crypto prices moving up or down, and these bets can trigger a rush on buying and selling, again leading to the rapid price movements. And many purchasers of crypto, especially young people, want to see big profits quickly, so when they lose large amounts, which is common, they often simply In addition to time and quit the market, contributing to the volatility.

Lack of regulation

When you invest in the traditional financial markets, your transactions are regulated by the Securities and Exchange Commission (SEC), and the firms with which you invest are typgains followed by enormous ically overseen by the Filosses – sometimes within a nancial Industry Regulatory buying shares of stock in a matter of hours. What's be- Authority (FINRA). Other Financial Advisor. Edward company that manufactures hind this type of volatility? agencies are also involved Jones, Member SIPC.

vestments. These regulating bodies work to ensure the basic fairness of the financial markets and to prevent and investigate fraud.

But cryptocurrency exchanges are essentially unregulated, and this lack of oversight has contributed to the growth of "scam" exchanges, crypto market manipulation, excessive trading fees and other predatory practices. This "Wild West" scenario should be of concern to anyone putting money in crypto.

cryptocurrency The market is still relatively new, and it's certainly possible that, in the future, crypto can become more of an investment and less of a speculation. In fact, Congress is actively considering ways to regulate the cryptocurrency market. But for now, caveat emptor - "let the buyer be-

How Indiana's property taxes compare across United States

Property taxes are the second largest

source of U.S. state & local tax revenue

Submitted

Despite many economic experts' worst fears early in the COVID-19 pandemic, state and local government budgets have proven resilient over the last two years.

With much of the economy shut down or hobbled as a result of the pandemic, forecasters initially ried that states and localities would collect substantially lower amounts of sales and income tax and face major budget shortfalls as a result. But behind falling unemployment, rising wages and strong consumer spending, income and sales taxes have produced stronger-than-expected revenues since the initial shock of the pandemic.

One factor that has helped protect state and especially local revenues over this period is property taxes, which are taxes levied on real property like land and buildings or certain forms of personal property. Property taxes tend to be more stable over time because property values are less susceptible to economic volatility than income and sales tax.

Depending on when taxes are assessed, it could take years for any significant changes in property values to become apparent in a government's tax collections. This certainly helped keep property tax revenues steady during the pandemic – and for some communities, collections could potentially grow in coming years due to the skyrocketing values of residential real estate.

Property taxes' stability could help continue to protect state and local budgets if the U.S. is headed toward a recession in the near future. Across the country, property tax collections represent 16.6 percent of state and local general tax revenues, which makes it the largest form of "own-source" reve-

ual income (12.9 percent)

and general sales taxes (12.5

State & local revenue (as a % of general revenue)

percent). Among all revenue sources, property tax trails intergovernmental only funds (22 percent), which comprises funds transferred from one government to another (most frequently federal to state or local) through grants, loans, and other agreements.

However, the overall mix of state and local revenue sources looks different across the U.S. Each state and local government offers a unique collection of revenue sources that weights income, sales, property, and other taxes differently.

For example, nine states have no state income tax, while five have no state sales tax. Others have caps on property tax rates or restrictions around how property valuations are conducted that limit the amount of revenue from property taxes. This means that individuals' specific tax burdens will look different depending on what state and local Northeastern states, includ-

Breakdown of Indiana's Property Tax Data

The analysis found that 12.3 percent of the general tax revenue collected in Indiana comes from property taxes. Here is a summary of the data for Indiana:

- Property tax as a share of total general tax revenue: 12.3 percent
- Annual property tax revenue (per capita): \$1,139
- Annual property tax revenue (total): \$7,666,490,000 Annual general tax revenue (total): \$62,345,742,000
- For reference, here are the statistics for the entire United States:
- Property tax as a share of total general tax revenue: 16.6 percent
- Annual property tax revenue (per capita): \$1,758
- Annual property tax revenue (total): \$577,007,937,000 • Annual general tax revenue (total): \$3,468,043,700,000

tax laws are in place where ing New Jersey, Maine, and they live.

Property tax collections across the states show these differences in action.

At the low end, only 6.9 percent of general tax revenue collected in Alabama comes from property tax, while at the high end, property tax is 36.5 percent of general tax revenue in New Hampshire. New Hampshire stands out in part because the state has neither an income nor a sales tax, so many services are funded at the local level through property taxes. Many of the other locations highly dependent on property taxes are nearby

Connecticut.

Graphic provided

The data used in this analysis is from the U.S. Census Bureau's 2019 Annual Survey of State and Local Government Finances. To determine the states that collect the most property tax revenue, researchers at Porch calculated property tax revenue as a share of total general tax revenue. In the event of a tie, the state with the greater annual property tax revenue per capita was ranked higher.

"What ifs" that should be considered throughout the travel industry

Generations upon generations have defined inventing travel, and reinventing trends, top destinations, attractions and much more. From the classic family trip to solo travel and

GUEST COLUMNIST JEREMY MURCHLAND

international travelers to chased or even considered road trip enthusiasts, we've seen just how peoples' knack for adventure has evolved in more ways than one.

Internally, we've also been witness to the transformations that have taken place for travel insurance providers. This is largely thanks to technological growth felt throughout the world as well as the diversification of product offerings and a greater emphasis on consumer awareness. Considering the travel insurance market grew from \$1.3 billion in consumer spending in 2006 to \$3.8 billion in 2019, the general expectation throughout the industry was that this growth would continue on a similar trajectory.

Little did we know, at that time, the implications of the upcoming pandemic would both challenge and promote growth.

As I reflect over these innumerable changes, I am even more motivated to consider a number of "what ifs" that can or could have disrupted the travel industry as we know it. There were a number of questions that I've asked myself; however, I find that four key scenarios remain top of mind as their resulting impact would be particularly influential on the travel industry.

What if the pandemic had not occurred?

This "what if" is incredibly weighted as the pandemic affected the world in many negative ways. In terms of the state of travel, the entire industry was halted, and consumers and ven-trip. dors alike found themselves in varying financial states. Consumers lost quite a bit of money that they had invested into their travel plans due

to the pandemic. While the possibility of disruptions has always existed and impacted some travelers, many had never anticipated that cancellations, changes and interruptions would affect them. Now, travelers are finding themselves in the position of having to consider "What happens if I get sick or injured when I travel?" and recognize the potential dangers of being in that situation without the proper coverage. There was a portion of travelers that didn't even realize that travel medical coverage existed; however, the pandemic generated greater consumer awareness and, in particular, a stronger awareness that domestic health insurance may not resources across their com-

age they need.

interacted with a number of people who have come to me for guidance on their next trip because they had never pur-

purchasing travel insurance in the past. These interactions have ranged from my friends, extended family and even one of my daughter's teachers. Individuals who have lived and interacted with an executive in this industry for years are now finally recognizing the need for this coverage.

Had the pandemic not occurred, it is very unlikely that this increase in consumer awareness would have been possible to achieve in trends closely and developsuch a short period of time.

On the flip side, what if something similar and/or unforeseen occurs again?

While the pandemic seems to be far from over with new cases and influxes being reported regularly around the world, it is important to consider how the industry would react to a new, similar situation. COVID-19 was impressionable on every generation, particularly for the younger generations that are just getting a taste of travel. Travel tips and suggestions that are currently standard to the industry will likely stick with them for years to come.

In Seven Corners' case, we saw the largest increase in Baby Boomer and Millennial purchases driven mainly by their desire for travel medical insurance and coverage for interruptions or cancellations. I foresee the future of travel to be widely influenced by cost conscious consumers that are looking to protect their investment, no matter the duration of the

As it relates to company operations, the pandemic forced organizations throughout the industry to build in stronger preparedness and crisis response plans. We've dealt with the initial panic and confusion surrounding drastic change; therefore, our future response to adversity will come from the lessons we've learned through this experience.

What if we're on the cusp of a recession?

Inflation greatly impacts travel insurers, which creates a domino effect throughout organizations as well as impacts the consumer. Trip protection products are priced based on trip costs; therefore, as trip costs go up, so does the cost of insurance for consumers.

Additionally, insurance providers would likely need to increase compensation for

customer service, which in Over the last turn would increase rates. two years, I've This dips into all industries

that are connected to travel. For example, the hospital and medical providers that provide services to those insured will now cost more, driving up claims cost and resulting in rate changes.

No company is immune to the impacts of global inflation, and it is certainly something that the travel industry is concerned about. This is one of the many reasons why companies like Seven Corners are focused improving processes and incorporating greater technological reliance as it promotes efficiency and can help offset some of the costs associated with travel.

For now, we're monitoring the macroeconomic

provide the cover- pany from sales to claims to ing long-term forecasts for simplifying policy language sales.

What if we fully bridged the gap between the consumer and the travel insurance provider?

Organizations need to implement a wide range of improvements as they prioritize their relationship with customers. Increased flexibility, expansion of "non-insurance services" and modifications to travel insurance products are just the beginning.

More travelers are purchasing insurance now, and insurers need to compensate for that increase by investing in technology and support teams to drive the best customer experience following each sale. Closing the gap more focus on educating consumers on offerings and app, SMS/Text, WhatsApp

to make them much more consumer friendly.

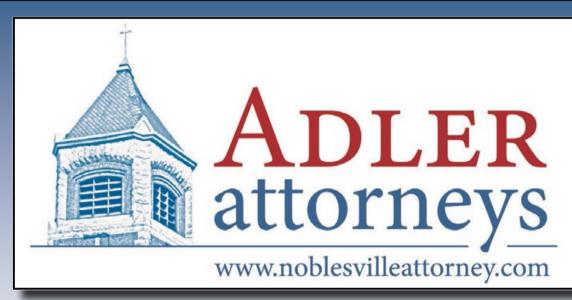

The movement of paper throughout the claims process also needs to be addressed as the complex jargon and excessive number of forms result in customer complaints that must be handled through time-consuming human interaction. Improving the claims process will provide a more positive experience and maintain a loyal customer base you've worked so hard to build.

For Seven Corners, investments in additional support staff for claims and customer service was a given. We've made significant investments into technology that encourages multi-chanand prioritizing customer nel communication with our relationships means placing customers. This includes our well-rounded mobile

and Sven, our chatbot for 24/7 policy questions and assistance.

While these are just a few of the many internal and external changes we have incorporated, I am in the unique position of operating on a forward-looking mentality and searching for capabilities that will add to the travel experience. With each new trend or obstacle that comes our way, our main focus will remain the same meeting the customer where they are and giving them the best possible service.

In 2018 Jeremy Murchland joined Seven Corners as vice president of sales and was appointed president in January 2020. In this position, he is responsible for leading the execution of Seven Corners' strategic plan and managing day-today business operations.

State Police Board. Recruits be used in the atomic bombs that would be dropped on were housed at the faircants were given physicals, grounds horse barn and their Japan. On its return voyage, the ship was torpedoed by a Japanese submarine, resulting in the deaths of 880 men.

1946 – Indiana colleges and universities prepared for a large influx of new students as veterans, home from World War II, took advantage of the GI Bill. Enrollments were 70 percent higher than pre-war peaks. School officials said that preferences were being given to Hoosiers and that most out-of-state applicants could not be accepted.

1959 – Fifteen-year-old Becky Collins, a swimmer at Broad Ripple High School in Indianapolis, became the youngest athlete to be featured on the cover of Sports Illustrated. She was an award-winner and part of the United States team that set a world record at the 1959 Pan American Games. Her swim team had its home base at the local Riviera

1979 – Breaking Away was released to theaters. Filmed almost entirely in Bloomington, the movie is a coming-of age comedy/ drama about young men growing up in a college town where their parents work at the limestone quarry. The American Film Institute calls it one of the most inspiring movies of all time.

TODAY'S BIBLE READING

And what more shall I say? I do not have time to tell about Gideon, Barak, Samson and Jephthah, about David and Samuel and the prophets, who through faith conquered kingdoms, administered justice, and gained what was promised; who shut the mouths of lions, quenched the fury of the flames, and escaped the edge of the sword; whose weakness was turned to strength; and who became powerful in battle and routed foreign armies. Women received back their dead, raised to life again. There were others who were tortured, refusing to be released so that they might gain an even better resurrection. Some faced jeers and flogging, and even chains and imprisonment. They were put to death by stoning; they were sawed in two; they were killed by the sword. They went about in sheepskins and goatskins, destitute, persecuted and mistreated—the world was not worthy of them. They wandered in deserts and mountains, living in caves and in holes in the ground.

These were all commended for their faith, yet none of them received what had been promised. since God had planned something better for us so that only together with us would they be made perfect.
